

JOINT ENROLLMENT OF HIGH SCHOOL STUDENTS AT COMMUNITY COLLEGES

FY 2015 Statewide Joint Enrollment by Type

NOTES:

Joint Enrollment consists of three types of enrollment:

- 1) Contracted (or concurrent) – offered under negotiated agreements, generally between individual high schools and community colleges; not included in the college's offerings to adult students. Cost to the school district is determined under the agreement. School districts receive additional funding for these students, generated by a weighting in the school aid formula, to offset the additional cost. The funding may be more or less than the actual cost to the school district.
- 2) Postsecondary Enrollment Option (PSEO)– a high school student may take a class at a community college if the class is not offered at the high school. The cost to the school district is \$250.
- 3) Tuition– a high school student may take a class at a community college by paying the regular rate of tuition. There is no cost to the school district.
